Skype	filiporastovic

I grew up in Sremska Kamenica, suburban neighborhood of Novi Sad, where I also finished elementary school. As a kid I would spend my time making toys, reading comics, epic fantasy novels and playing video games. During high school, I played guitar in the school orchestra, worked on technical support and special effects for the school theatre and designed bunch of animated powerpoint presentations. During college I started developing small video games as a hobby and began my career as a freelancer utilizing everything I've learned through education and on my own. I'm passionate about technology and developing creative solutions to whichever problem I come across. I'm an avid reader and music lover.

Professional Resume

EXPERIENCE

2012 - present

Web Developer - Designer

HTML/CSS/JavaScript/PHP/WordPress/Adobe XD/Photoshop

Over 6 years of web development (HTML, CSS, JavaScript, php) and web design (UX,UI,IxD/HCI/HF/UxD/IA) experience using different tools: Photoshop / Adobe XD/ Illustrator / Unbounce. I put huge emphasis on determining user needs through UX research to build UX/UI that solves user problem, fits the market and is easy to use. My specializations are conversion centered and persuasive design of landing pages / click funnels that generate leads, design and development of websites / web apps for small to mid-sized businesses and gamification of your software. I also run A/b tests on my designs using analytics and heatmaps, analyze the data and change the design so it satisfies your audience. My clients are webpreneurs, agencies, startups and small to mid-sized businesses in a need of better software solutions. I design video games as a hobby – my games are published by a Silicon Valley publisher and thousands of gamers play them daily.

EDUCATION

2012-2016

Faculty of Technical Sciences

Computing and Control Engineering

Department of applied computer science and informatics. I have understanding of data structures, computer architecture, object oriented programming, design patterns, software engineering methodologies and web development concepts.
